

My Invention

By: Gabby Mravkarov

Can you dance? Well, if not don't worry the dancing dance shoe is here! Don't pay for dance lesson, buy the dancing dance shoe that is only \$35.00. Better yet, make it yourself made by items at home.

First, get your shoe. Next, if you are a child ask an adult to do this for an adult to do this for you. Cut the heel and place a little box. In it has to be a box without anything inside it. The box has to be metal and create a machine that has a memory of the best dance moves from TV shows. Put it into a flash drive, put the dance moves in order. If you make this, it will take a day.

When you walk to the place you need to go to it will not start. If you stomp once or twice your feet will start to dance. This is the best invention. This will help you save money, so you don't have to pay for dance lessons, you can buy the shoes for \$35.00, even better make it yourself by items from inside your home. Follow the instructions and be safe. Live life and INVENT ON!

Tidbit/Evidence for ST1. 6: With the help of the Lucy Calkins Series and access to Write-Score mini-lessons, students got to explore the life of an engineer through writing informational pieces. Their specific goal was to create an invention and write a how-to essay on designing it. As writing is an interdisciplinary problem, students mainly focused on transitional and chronological words to describe the process taken to make an effective invention. Once final draft was written, students were able to use laptops/computers to publish their writing.
